## PROFESSIONAL SUMMARY

Lead Software Engineer with **9+ years** of experience building scalable SaaS platforms serving **70K+ customer** accounts and millions of users globally. Expertise in **React, TypeScript, frontend architecture, WebSockets, and state management**, with working experience in **Node.js, Python and REST APIs**. Proven track record leading architecture modernization, improving platform performance, engineering productivity, developer experience and delivering measurable business outcomes across large-scale products. **Open to relocation.**

## CORE COMPETENCIES

**Frontend Platform:** React, TypeScript, Next.js, JavaScript (ES6+), TanStack Query, Zustand, HTML, CSS, Tailwind CSS.

**Architecture & Platform:** Micro-frontends, Monorepos, Design Systems, Web Components.

**Backend/APIs:** Node.js, Python, GraphQL, REST APIs, WebSockets, MongoDB.

**Cloud & DevOps:** AWS, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD.

**Testing:** Jest, Playwright, React Testing Library, E2E.

**Performance & Observability:** Web Performance, Core Web Vitals, Bundle Optimization, Lazy Loading, Sentry.

**Developer Productivity & AI:** OpenAI APIs, Cursor, Claude, GitHub Copilot.

## EXPERIENCE

### Lead Software Engineer | Freshworks | Hyderabad | July 2025 - Present

- **Architected and launched a real-time React and TypeScript micro-frontend** using **WebSockets** and client-side state management, supporting live ticket updates, advanced filtering, and complex UI states while **reducing update latency by 33%**.
- Building the **Device42 (D42) integration** for Freshservice's **Inventory Workflow Automator**, integrating inventory data into automated IT asset management workflows.
- Built an **AI-assisted incident resolution workflow** integrating **Sentry, OpenAI APIs, and GitHub automation** to analyze production errors, **reducing L2 support tickets by 20%** and accelerating debugging and root-cause analysis.
- Built **backend APIs and integration services** using **Node.js, TypeScript, REST APIs, and serverless AWS services**, supporting end-to-end delivery of customer-facing features.
- Delivered **WhatsApp Business API integration** for Freshdesk's omnichannel support platform, improving **ticket resolution efficiency by 12% within two months**.
- Led frontend platform modernization through **micro-frontends, reusable design system components, and shared libraries**, improving maintainability, UI consistency, and developer experience across teams.
- **Led and mentored 5 engineers** across architecture, code reviews, engineering excellence, and delivery execution, improving code quality and team productivity.

- Drove architecture, **CI/CD improvements**, engineering standards, and cross-functional delivery across backend, SRE, design, and product teams.

### Senior Software Engineer | Freshworks | Hyderabad | October 2021 - June 2025

- Optimized **WebSocket** connection management, reducing redundant connections by **~80%** and lowering socket-related memory and heartbeat overhead by an estimated **60–70%** across high-traffic pages.
- Reduced frontend bundle size by **~18%** (~350 KB gzipped) and improved render performance by **~28%** through lazy loading, feature flag cleanup, and bundle optimization.
- Improved **accessibility** across critical workflows using axe, semantic HTML, keyboard navigation, and WCAG best practices.
- Enhanced platform reliability by resolving **180+ production incidents quarterly** across L2, L4, and L5 severity levels, achieving **94.5% SLA compliance** and earning multiple “True Friend of Customer” awards.
- Migrated a **72k-line React** class component codebase to modern functional components and hooks, then shipped as a web component integrated into a legacy Ember application, reducing maintenance overhead by **~30%**.
- Architected and scaled a React-based marketplace platform integrating **5 telephony providers**, enabling **400+** businesses and reducing integration time by **45%**.
- Supported **25+ enterprise customers** integrating the Freshchat SDK across frontend ecosystems including **Next.js** and **Vue.js**, improving integration success rates and increasing customer engagement by **17%**.

### Software Engineer | Freshworks | Chennai | September 2019 - September 2021

- Built the Average Handling Time analytics feature in Freshdesk, enabling support teams to measure agent performance and helping prevent customer churn worth **\$12.25K MRR**.
- Improved **CI/CD** pipelines using Jenkins, resolving **250+** linter issues and reducing build times by approximately **7 minutes**.
- Increased automated test coverage from **~40% to 100%** across 2 critical frontend modules using **Jest** and **Mocha**, improving release confidence and reducing regression issues.
- Delivered an **AWS Lambda** and API Gateway-based integration workflow enabling partners to push leads directly into Freshsales, reducing onboarding costs by approximately **\$2 per lead**.

### Web Developer | Freshworks | Chennai | June 2017 - August 2019

- Implemented hreflang tags across multilingual websites, improving international SEO discoverability across **18+ language variants** and regional sites.
- Migrated **1000+** static marketing pages to Apostrophe CMS using **Node.js** and **MongoDB**, enabling **60+ marketing stakeholders** to manage content independently and reducing developer maintenance overhead by **~80%**.
